

REGULATION COMPLIANCE STATEMENT Low Halogen

Statement Issue Date: 07/18/2025

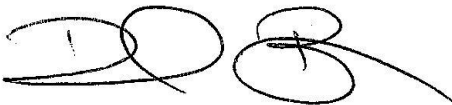

Products Covered: All Products Manufactured by Bead Electronics & Bead Chain

Bead Electronics confirms that, to the best of our knowledge, our products are designed and manufactured in accordance with industry best practices to minimize the presence of halogenated compounds. Specifically, we strive to ensure that materials used in our products contain less than:

- 900 ppm of chlorine,
- 900 ppm of bromine, and
- 1500 ppm total halogens,

as defined by commonly recognized low-halogen industry standards such as IEC 61249-2-21.

This statement is based on supplier declarations and material specifications and has not been verified by analytical testing.
